SEED AND FLORAL CATALOGUE

1902.

C.W.EICHLING'S
FRESH SEEDS **THAT GROW.**

TRADE MARK

CREOLE ONION

TRUE TO NAME.

SEED 

and NURSERY

 **CO., Ltd.**

Eichling

Store: No. 129 Camp St.

Nursery: Carondelet and Sixth Sts.

NEW ORLEANS, LA.

Our Specialties are
SEEDS
FOR THE
TRUCKFARMER
AND
SHIPPER.

FOR twenty years we have been in daily touch with the **TRUCKFARMERS** of the South. We have made a study of the best shipping varieties of the different sections and the **TRUCKERS** know that they can rely on us for good seeds. Our prices are right and in keeping with best quality.

GENERAL DIRECTIONS TO CORRESPONDENTS.

Prices in this list are f. o. b. New Orleans, freight or expressage to be paid by the purchaser. For small orders, to be sent by mail, add at the rate of 9 cents per pound, and 15 cents per quart, for postage.

How to Send Money. Send full amount in Money or Express Order, Draft on New Orleans or New York, Cash in Registered Letter, or small amounts in postage stamps.

Name and Address. We often receive orders and letters without signature or name of postoffice and State. Be very particular in giving shipping directions, if by mail, express, boat or railroad. If railroad station has no agent add a sufficient amount for freight prepay.

Non-Warranty. We wish it to be distinctly understood that, although we continue to take all possible pains to supply only Fresh, Genuine and Unadulterated Seeds, Plants, etc., we still give no warranty, expressed or implied, as to description, quality, productiveness or any other matter, of any of the articles we send out, and will not be in any way responsible for the crop. Every order received for articles named in this Catalogue will be executed on these conditions only.

Deutsche Correspondenz—Bestellungen in Deutscher Sprache werden mit Sorgfalt ausgeführt.

Correspondence Française.

WHOLESALE PRICE LIST

FOR

TRUCKFARMERS AND ASSOCIATIONS.

Prices do not include freight. Have your seeds shipped by express or freight.
If by mail add 9 cents for each pound, and 15 cents per quart for postage.

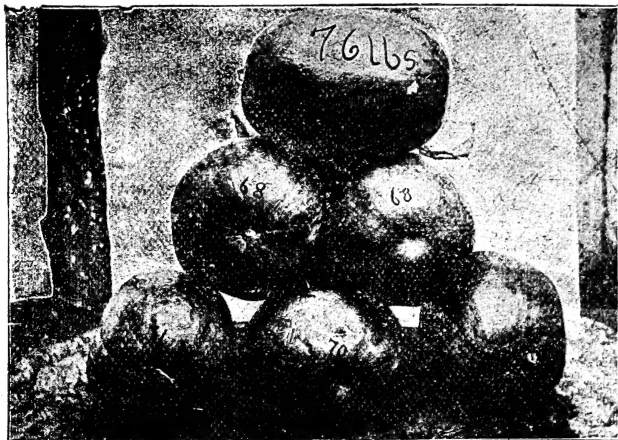

PEAS are a very short crop, almost a failure. Prices range high and supply is limited. No **Peas** sold except with an order for other seeds.

MELONS, CUCUMBERS and TOMATOES were only half a crop, owing to the long drought during summer.

WAX BEANS will not cover the demand by one-half. Short crop and increased acreage keep prices high.

WATER MELON—ALABAMA SWEET and TRIUMPH. We were particularly fortunate in getting a fair crop of the genuine stock grown by the originator. Order at once before supply is exhausted.

Wholesale Discounts to Truckers.

Triumph Water Melons.

OFF PRICES QUOTED IN THIS CATALOGUE:

10 Per Cent. on Peas, Beans and Corn.

25 Per Cent. on all other Vegetable Seeds.

No Discount on Onion Sets, Grass, Clover and Field Seeds, Seed Potatoes, Plants, Trees or any other article in this Catalogue.

Examples, for Seeds shipped by Express:

Wardwell's Kidney Wax	per bushel....	\$6 00
Less 10 per cent.....		60
Net.....		\$5 40 per bushel.
Triumph Water Melon	per pound....	50
Less 25 per cent.....		12
Net.....		38 per pound.
Rocky Ford Canteloupe	per pound....	60
Less 25 per cent.....		15
Net.....		45 per pound.

If by Mail add at the rate of 9 cents per pound, and 15 cents per quart.

REMEMBER—For the last twenty years we have supplied the largest Truckfarmers of the South, especially in Texas, Louisiana and Florida, and 75 per cent. of the **Cabbage, Cauliflower, Onion** and **Melon** Crops are grown from our Seeds.

Our Creole Onion has always been found genuine and true. We are so proud of its superior quality that we made it our **TRADE MARK** years ago. We have again a very fine crop of heavy seed this year. No Truckfarmer can risk a crop with doubtful seeds. Be on the safe side and sow **Eichling's Creole Onion**. Price for fresh crop on application after July 1.

Bermuda Onion—The genuine imported article which we have sold for a number of years; per pound, \$2.50, less 25 per cent., \$1.88 net. Ready September 1.

We come to you this year with a

VALUABLE PROPOSITION.

We offer to our customers **Several Thousand Dollars** in form of reduced prices, the difference in cost between a fancy catalogue for which they would have to pay and this plain book.

You will find in this catalogue **Everything** for the **Garden, Field and Orchard**, and Everything of the Best, as we have sent out for the last twenty years.

We have the largest stock of **Seeds, Bulbs, Roses, Palms, Bedding Plants, Fruit Trees, Shade Trees, Shrubs, etc.**

We give you the benefit of our experience of many years; you may depend on faithful service.

SEEDS IN PACKAGES of 5 and 10 cents, mail postpaid. Dozen, 40 and 80 cents; half dozen, 25 and 50 cents. For pounds add 9 cents, for quarts 15 cents for postage.

NO GOODS SHIPPED C. O. D. except when one-half of the amount is remitted with order.

PERSONAL CHECKS only accepted if 10 cents is added for exchange. Only New Orleans and New York Exchange taken at par.

LOSS AND GUARANTEE. After delivering shipments in good order at post or express office our responsibility ceases, and goods travel at the risk of the purchaser. Valuable packages should be registered. If so desired add 8 cents to the amount of your order.

SPECIAL PRICES TO TRUCK FARMERS' ASSOCIATIONS.

Orange Trees.

How to Protect Them Against the Freeze.

All our Orange trees are budded low down near the root, in December the ground is banked up against the trunk covering the bud and protecting it against a freeze. Should the top get killed the strong root remains with the healthy bud under the ground, which makes in one year, with good cultivation, a tree six to eight feet high and five feet across. We have seen this done and IT CAN BE DONE ANYWHERE NEAR THE GULF. The crop of a grove of Mandarins which was cut down in February, 1899, was sold in 1900 for \$2,500.00 and will be worth \$4,000.00 next year.

Mandarins, budded on hardy citrus trifoliolate or sour stock.

Satsuma, the hardiest and earliest of all oranges.

Louisiana Sweet or Creole orange.

Tangerine, Kidglove variety, very sweet.

Washington Navel, largest variety of all.

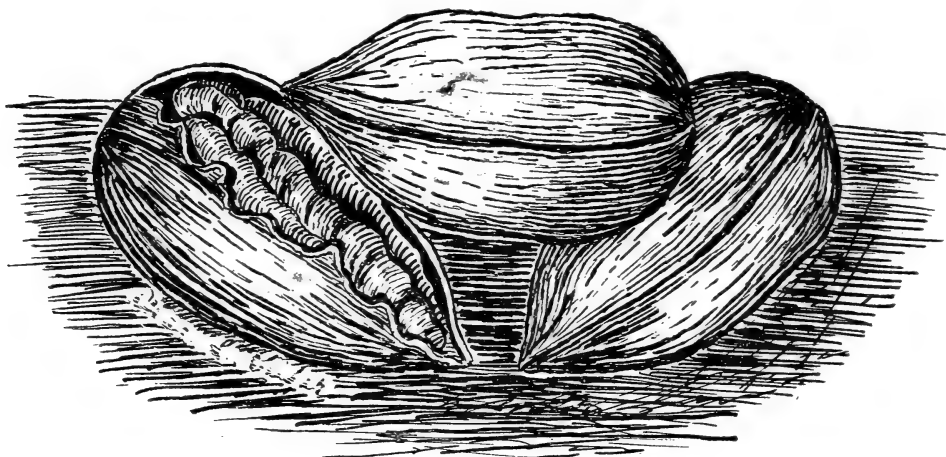

Grape Fruit, or Pornelo, for preserves.

Kum-Quat, small oval fruit size of a pigeon egg, very hardy and ornamental, eat skin and all, 50c. to \$1.00.

Prices of Orange trees 2—3 feet, 50 cts. each; doz. \$5.00; branDED trees ready to bear 75 cts. to \$1.50, doz. \$8.00 to \$12.00.

American Wonder Lemon, "Ponderosa," ever-bearing, fruit of the best quality, from one to three pounds each, fine for tubs; bears when two years old, very useful and ornamental. Thrifty young plants 35 cts. each; extra strong 50 cts. to \$1.00, by express only.

No Fruit trees by mail; they are too large and heavy.

GRAFTED PAPERSHELL PECANS.

This is undoubtedly a very valuable fruit tree for the Southern States. A pecan tree once bearing will continue to do so and increase in yield from year to year, reaching an old age and resisting all attacks of cold, heat or drought, to which other fruit trees succumb much sooner than the pecan. Large soft-shelled nuts are always in demand at high prices, and the trees I offer are the very best varieties in existence.

The shell is very thin and can be easily broken between two fingers.

Grafted trees of these varieties are exceedingly scarce, and must not be compared with cheap stuff advertised by some as papershell pecans, which in many cases have been found to be nothing but the common small-sized nut.

A budded tree naturally reproduces the same large nut of the parent tree from which the bud was taken and, the same as the Peach tree, will bear much sooner when budded. Budded Pecan trees bear five years after planting.

This is our great specialty. We consider this the best investment in the South.

The demand for large softshell Pecans will not be supplied in fifty years.

Eichling's Mammoth Egg Shell, very large Oval, round at both ends; the thinnest shell of all.

The Rome. The largest Nut of all. Pointed at one end.

Russell or Pride of the Coast; similar to Rome.

Centennial. The most prolific of the three; very long and thin shelled.

Price. 2½—3 feet, each \$1.00.
 3—5 " " \$1.50
 5—6 " " \$2.00

Extra heavy trees, 7 feet and over, \$3.00 each. Discount 20 per cent. on lots of 50 trees or over.

PEACHES.

We have all the varieties specially suited for the South, both Free and Cling Stones. Trees 5—6 feet and well branched.

Free Stones following in season as placed on the list:

- | | |
|--------------------------|-------------------------|
| <i>Jessie Kerr.</i> | <i>Amelia.</i> |
| <i>Amsden.</i> | <i>Stump the World.</i> |
| <i>Alexander.</i> | <i>Thurber.</i> |
| <i>Elberta.</i> | <i>Old Mixon.</i> |
| <i>Early Louise.</i> | <i>Crawford's Late.</i> |
| <i>Fleitas St. John.</i> | <i>Smock.</i> |
| <i>Mountain Rose.</i> | <i>Picquet's Late.</i> |
| <i>Foster.</i> | <i>Lady Parham.</i> |
| <i>Crawford's Early.</i> | |

CLING STONES.

- | | |
|---------------------|---------------------------|
| <i>General Lee.</i> | <i>Stonewall Jackson.</i> |
| <i>Old Mixon.</i> | <i>Lemon.</i> |
| <i>Health.</i> | <i>Nix White Late.</i> |
| <i>Butler.</i> | <i>Stinson's October.</i> |
| <i>Chinese.</i> | |

As they follow in the list they ripen in succession. Price, 25c. each; \$2.50 per dozen; \$15 per 100.

APRICOTS.

Santa Fe and Russian, the only two varieties worthy of planting in the South. 25c. each.

FIGS.

Celeste or Sugar Fig, the best for all purposes, 20 cents each, \$2 doz., \$10 per 100. Extra large size, 50 to 75 cts. each.

Summer Queen. Large yellow striped, red, very fine, 25 cents.

For Oranges and Lemons, see page 15.

NECTARINES.

A variety of Peach with smooth skin, very sweet, free stone. 25c. each.

ALMONDS—30 cents each.

PLUMS.

Japanese Varieties, large fruited and profitable Market Fruit.

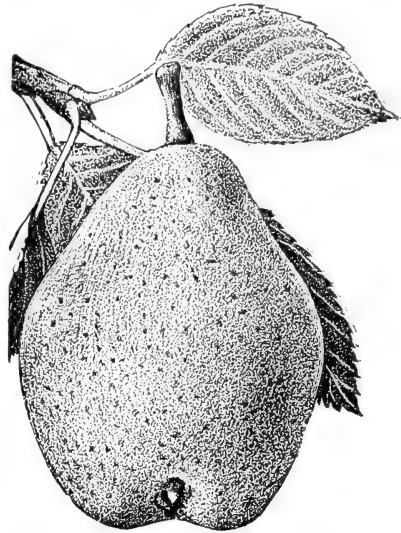

Wickson, Abundance, Burbank, Satsuma or Blood Plum, Kelsey, Ogon. Price 25c., \$2.50 per doz.

Domestic Varieties. Marianna, Wild Goose, Simoni. 25 cts. each, \$2.50 per doz.

MULBERRIES.

Hick's Everbearing, Downing, Stubbs, 25 cts. each, \$2.50 per doz.

PEARS.

Le Compte Pear.

Le Compte, very Early and best in the South.

Kieffer, large Late Pear, good for cooking.

Howell, medium size, very sweet and juicy.

Clapp's Favorite, large, very Early and and showy fruit.

Bartlett, well known favorite, should be planted together with Le Compte to fertilize the blossom.

Duchesse d'Angouleme, excellent French variety, shy bearer.

Smith, earlier and richer than LeCompte, Hybrid Sand Pear.

Garber Hybrid, almost blightproof, very delicious and juicy. August and September. Price, 25c. each, \$2.50 per doz. Extra large trees 50c. each.

JAPANESE PERSIMMONS.

Fruit as large as an Orange, most varieties seedless, very delicious. 6 best varieties; 30 cts. to 50 cts. each, \$3.00 per doz.

CHESTNUTS.

Japanese Mammoth, large sweet nut, bearing very young. 50 cts. each.

QUINCE.

Orange and Japanese Mammoth. 25 cts. each, \$2.50 per doz.

MESPILUS or JAPAN MEDLAR, 40 cts. each.

POMEGRANATE. Spanish Ruby. 25 to 50 cts. each.

WALNUTS.

Japan Dwarf and English Walnuts. 50 cts. each.

GRAPE VINES.

Standard Varieties. Triumph yellow, Moore's Early black, Brighton, Red, Ives, Seedling black, Delaware small red, Niagara large white, Concord Early black, Catawba dark red, Norton small black, Herbemont, best early red. Price, 20 cts. each, doz. \$2.00.

New American Varieties. Presley early red, Brilliant large red, Rommel white, Beacon black, Delgado red, Carman black, Gold Coin yellow, Muench purple, Fern dark purple, Laussel purple. Price, 35 cts. each, the set of 10 for \$3.00.

MUSCADINES or SCUPPERNONG GRAPES.

Flowers, Thomas, Scuppernong, 25 cts. each, \$2.50 doz.

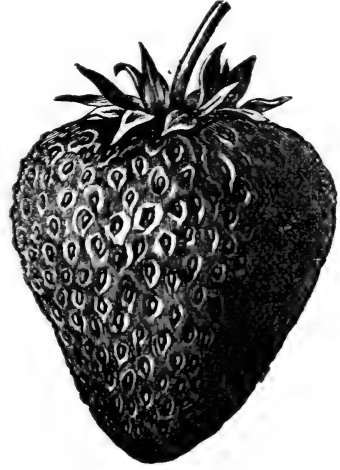

BLACKBERRIES.

Early Harvest, Ohmer, Wilsons Early; 10c. each, doz. \$1.00.

Dewberries. Austins improved: 10c. each, doz. \$1.00.

GUAVA.

Excellent for Jellies. 50 cts. each.

STRAWBERRIES.

Excelsior.

The best and most profitable varieties for Southern planting: **Lady Thompson, Hoffman, Cloud, Michel's Early, Picker Proof,** 50 cts. per 100, \$4.00 per 1,000.

Excelsior, new, the best heat resisting variety, very prolific and the most profitable variety known up-to-date, 75 cts. per 100.

Klondike. Novelty of the first rank, largest fruit, very prolific, 25 cts. per doz.; \$1.50 per 100.

BEGIN SOWING in August and September Primula Chinensis and Cinerarias, Glaxinias and Carnations. From October to December follow with Asters, Daisies, Pansies, Phlox, Pinks, Sweet Alyssum, Candytuft, Snap Dragon, Sweet Peas, Lobelia, Verbena, etc. In November and December sow Asters and Pansies for a succession, Calendula, Campanula, Centaurea, Chrysanthemum, Clarkia, Delphinium, Geranium, Hollyhock, Larkspur, Marigold, Mignonette for pots. Nasturtiums, Petunia, Poppy in open ground, German Stock and Verbena.

End of January and February sowings in the open ground of other varieties may be risked, but the time for sowing should always be observed as indicated for each variety. Sowing in shallow boxes is always preferable to the open ground, as the seedlings can be better protected against cold and heavy rains.

FOR ALL SAINTS' DAY FLOWERS sow in July and August, Zinnia, double white and mixed; Cockscomb, dwarf crimson; Balsams or Lady Slippers, Camelia-flowered, white and mixed; Comphrena or Bachelor Buttons, white and red. Zinnias and Balsams must be transplanted on rich soil two feet apart each way; Dwarf Cockscomb, one foot and a half.

Snow Cosmos, the new giant varieties, during July; they will give you an abundance of flowers for All Saints' Day. Transplant on well-matured land two feet apart. Plant Dahlia Roots in April and May; Chrysanthemums from March to June. Sweet Peas should be sown from October to March. Not later.

General List of Flower Seeds.

All Flower Seeds Put up in Five Cent Packages, Six
for Twenty-five Cents, One Dozen
for Forty Cents.

— Except Where Special Price is Noted —

 Apios tuberosa, Wistaria-like, 10 cts. each.

ROSES.

We are the Largest ROSE Growers in the South, and our collection has always been acknowledged the most complete and most reliable with reference to the requirements of the Southern climate.

Though the South is practically the "Home of the rose," yet this climate has its peculiarities, affecting different varieties in a different manner, and only the *Rose Specialist*, who has practical experience with growing Roses and has watched and studied their peculiarities, can intelligently say what varieties of the thousands in existence are suitable for Southern planting.

Money is Lost in Roses every year by buying from dealers who do not know what they sell their customers, caring only for the dollars.

Stop sending Money North for Roses

consult our list and write for advice, stating the varieties you have.

Cultivation. Roses delight in rich, well-drained soil, in a position where light and air have free access. Especially the morning sun is very beneficial to the growth and blooming of Roses. Marechal Niel should always have an Eastern exposure and sun only until noon; by no means plant a Marechal Niel in a place where the sun only reaches it after noon. This and the lack of proper drainage is the principal cause of failure with this lovely climber. Do not spade or dig too near the roots; an occasional light cultivation or loosening of the soil and

a layer of rotted stable manure on top of the soil is all that is needed to keep Roses in good health. A good sprinkling of bone-meal assists them wonderfully in their development.

Prices: 1-year-old, 10c. each, \$1.00 per doz., *postpaid*.
2-years, well-branched, 20c. each.
\$2.00 per dozen, by express.

Extra large field-grown Roses a specialty.

We offer 10,000 strong, bushy plants, in 200 varieties, from \$3.00 to \$5.00 per dozen, by express or freight.

We only prepay 1-year-old roses at \$1.00 per dozen.

 Mulberry, very strong, both Shade and Fruit, 50 and 75 cts. each.
 Salisburia or Maidenhair Fern Tree, very rare and ornamental, 75 cts.

Monthly Memoranda for Planting.

January.

Sow Artichokes and Asparagus and set out the plants. Sow Beets of all kinds, Cabbage for summer crop, Carrots, Chervil, Cress, Corn-Salad, Cauliflower, latest crop, Cucumbers, Egg-Plants, Peppers and Tomatoes in hot beds; Endive, Spinach, Sorrel; divide and set out Shallots; sow Parsley, and Parsnip, Peas, the early varieties, towards the end of the month; Radish, Roquette, Turnip, Rutabaga and Spinach.

POTATOES—Plant for early crop.

PEAS—Plant the *First* and *Best*, towards the end of the month for shipping; Black-eyed Marrowfat Peas for late crop.

ONIONS—Sets may be raised from seed sown this month. Northern sets produce no onions here, except the true Bermuda.

CABBAGE—Sow early varieties, especially Early Spring and Wakefield, Eichling's Extra Early, Oxheart and Sugarloaf. Large Brunswick sown in this month often makes the finest heads in April and May. Cabbage plants, from seed sown in November and December, should be set out this month.

CAULIFLOWER should be sown in frames to transplant in February and March. The Snowball, Half Early Paris, Lenormands and Early Erfurt are recommended.

CUCUMBERS, Tomatoes, Egg-Plants, Peppers and Herb seed should be sown in frames or hot-beds.

TURINPS and Rutabaga can be sown for family use; for shipping purposes it would be too late. Sow flower seeds and plant out bulbs.

In the Field

Sow Texas Red and Turf Oats, also Mangel Wurzel and Sugar Beets for stock food.

In the Orchard

Fruit trees of all kinds, such as Pear, Plum, Peach, Apple, Pecan and Orange Trees may be set out. Citrus trifoliata and Pecans for stools to bud upon should be sown now. The sooner the Pecan nuts are sown the better they come up.

In the Flower Garden

Trim your Rose Bushes, strong branches to one or two feet, thin wood to a few eyes. Continue to sow Flower Seeds for Spring and early Summer blooming. See Flower Seed List.

February.

Sow Artichokes, Asparagus, Beets, Bush Beans, Cabbage, Carrots, Celery for cutt'ng,

Chervil, early Corn, Cress, Corn Salad, Cauliflower, Cucumbers, Endive, Egg-Plants, Herbs of all kind, Kohlrabi, Leek, Lettuce, Melons, Mustard, Onions for sets, Spinach, Squash, Swiss Chard, Sorrel, Parsley, Parsnip, Peas of all kinds, Pepper, Potatoes, Radish, Roquette, Tomatoes, White and Red Top Turnips.

LETTUCE—Sow the improved Royal Cabbage and some New Orleans Passion for last crop.

PEAS and POTATOES—Plant for general crop, including the early varieties.

CABBAGE—Sow only early varieties—Early Spring, York, Early Flat Dutch, Oxheart and Savoy Cabbage.

BEANS—The first Planting of Mohawk, Yellow Six Weeks and Best of All Bush Beans can be made in the beginning of the month. Risk a sowing of Bush Wax Beans. Towards the 15th plant Best of All for a general crop and follow with Wax, Refugee and Valentine.

CORN—Plant Southern Express, Adam's Early and St. Charles for the market, and some Sugar Corn for family use.

CUCUMBERS, Melons and Squash may be risked in the open ground, towards the end of the month, but will require protection in cold weather.

TURNIPS—White and Red Top, strap-leaved for Spring and Summer.

TOMATOES, Pepper and Egg-Plants continue to sow in frames. Some Early Cauliflower may still be sown. Snowball is the best.

SWEET POTATOES should be planted now in bed for slips. Plant Fruit Trees of all kinds.

HOT-BEDS NEED prompt attention; give air on sunny days and look out for cold nights.

In the Field.

Continue to plant Potatoes for a general crop. February may be considered the best month, they will do better and yield more if planted in this than in any other month. Mangel Wurzel and Sugar Beets for stock food may yet be sown.

Sweet Potatoes can be laid in a bed for sprouting so as to have early slips.

In the Orchard.

Set out Fruit Trees of all kinds, especially Orange and Pecan trees. Sow yet Pecan nuts and Citrus trifoliata seeds to raise stock.

In the Flower Garden.

Sow flower seeds for late Spring and early Summer blooming under glass, such as Zin-

nias, Balsams, Torenia, the different varieties of Amaranths and Gomphrenas, etc.
Sweet Pea "Belle Creole" may yet be sown.

March.

Sow Artichokes, Beets, Bush and Pole Beans, Carrots, Celery for cutting, Chervil, Corn, Cress, Corn Salad, Cucumbers, Endive, Egg-Plants, Herbs, Kohlrabi, Leek, Lettuce, Mustard, Okra, Spinach, Squash, Swiss Chard, Parsley, Peas, Pepper, Potatoes, Radish, Roquette, Tomatoes, White and Red Top Turnips. Eichling's Long Green Prolific Cucumber plant in open ground for shipping. Plant Corn of all varieties, except the Adam's Extra Early. Give the Leaming a trial, best field corn for the South. Sorghum, Milo Maize and Kaffir Corn may be sown at the end of this month.

BEANS—Plant a general crop of Bush and Pole Beans. All the Wax varieties, especially the Kidney Wax, should be planted this month. Plant some Rust-proof and a large patch of Creaseback for shipping.

PEAS—It is getting late for them; only Extra Early Peas may be planted, which ripen before the heat comes.

POTATOES and **CORN**—Continue to plant; Sugar Corn for table use.

TURNIPS—Red Top and White Dutch, the last sowing.

TOMATOES, Egg-Plants, Pepper, etc., must be sown for a succession. Do not plant Lima (Butter) Beans and Okra until the end of the month.

LETTUCE—Improved Royal Cabbage is the best for this month and all summer. Sow some Paris White Cos or Romaine Salad.

WEEDS—Keep your garden clean from Weeds.

In the Field.

In the first half of the month Potatoes may still be planted and will yield well if the weather is favorable. In fact, we have seen the finest crop raised from Potatoes planted on the 15th of this month.

Sow Lespedeza at the beginning of March, and toward the end Sorghum, Kaffir Corn, Giant Beggar Weed, Teosinte and Milo Maize for stock food. Plant Sweet Potatoes to grow for the general crop.

In the Orchard.

Little can be done during his month beyond keeping the grass off and mulching newly planted trees. Sometimes when the season is retarded, trees may be set out the first half of the month.

In the Flower Garden.

All summer bloomers may be sown during March. Plant Dahlia, Gladiolus and Tuberose Bulbs and set out Chrysanthemums for Fall Blooming.

April.

Beets, Bush Beans, Pole Beans, Lima Beans, Carrots, Celery for cutting, Chervil, Corn, Cress, Cucumbers, Endive, Egg-Plants, Kohlrabi, Lettuce, Melons, Mustard, Okra, Squash, Swiss Chard, Parsley, Pepper, Pumpkin, Radish, Roquette, Tomatoes.

Where Irish Potatoes were dug, the ground may be planted in Squash, Melons, Corn, Pumpkin or Wax Beans.

Be sure to plant Bush Beans, Pole Beans, Okra and Beets. Also Sow Egg-Plants, Pepper and Tomatoes for a succession.

Cauliflower, make a sowing of late Italian Giant.

Set out Sweet Potato slips.

Sow German Millet this month, it is the best of all foliage crops, three pecks to the acre.

In latitudes north of New Orleans, all that is recommended for March will apply to this month.

Take care of your small potatoes, put them in thin layers on a dry airy floor to save them for August planting.

In the Field.

Plant Sweet potato slips for an early crop; dig Irish Potatoes planted early and prepare the land well to plant Corn either for the market or for stock food.

Plant Cashaw, Cheese and Field Pumpkins, Green Cashaw Pumpkins, for size, firmness of flesh, etc., cannot be excelled.

German Millet should be sown this month; also all varieties of Sorghum, Kaffir and Dhouro Corn, Milo Maize and Giant Beggar Weed for stock food.

German Millet is an excellent forage plant, and should be planted by every farmer and planter. Before sowing, the ground should be well prepared, that is, well plowed and harrowed, so as to get the surface fine and mellow.

Three pecks of seed is the quantity required to sow an acre.

The ground, after sowing the seed, should be well rolled and the seeds require no further covering; but if no roller is handy, some brush tied together, and passed over the newly-sown field, will cover the seed effectively. For Hay, Millet should be cut when in bloom.

The Flower Garden.

Requires close attention. Plants, such as Zinnias, Balsams, Torenias, Amaranths and Dahlias, sown last month, should be transplanted now and others sown for later blooming. Set out Chrysanthemums yet for Fall blooming; plant Dahlia Bulbs, Gladiolus and Tuberose.

May.

Sow Pole Beans, Celery, Corn, Cauliflower, Cucumbers, Endive, Lettuce, Melons, Squash, Pumpkins, Radish and Tomatoes.

CELERY—This is the proper month to begin sowing Celery; use the Large White Solid, keep shady, well aired and watered.

CAULIFLOWER—Sow the Italian Giant.

Set out Sweet Potato slips. Plant the first Cow Peas, one bushel per acre, and plow under when Peas are in blossom.

June.

Sow Pole Beans, Celery, Corn, Cauliflower, Cucumbers, Endive, Lettuce, Melons, Okra, Squash, Pumpkin, Radish and Tomatoes.

Continue to plant Southern Prolific and Creaseback Beans.

Early and Late Italian Cauliflower can be sown this month.

RADISH—Continue with the Half Long Scarlet, but make also a sowing of White Strassburg and Yellow Summer Radish, the best varieties for the month.

LETTUCE—Sow Eichling's Market, and observe directions for sprouting before sowing. Lettuce seed must be sprouted during the months of May, June, July and August. As soon as cooler weather sets in, it comes up without any trouble.

Sow Endive, as it stands the heat well, and makes a salable salad.

July.

CABBAGE—Towards the end of July begin to sow Eichling's Extra Early All-Head, Stein's Early and the Late Flat Dutch. If you succeed in raising plants from July and August sowings, set out in September you will make a splendid cabbage, as it will be headed by the time heavy frost sets in. Beware of September sowings of late varieties. Your Cabbage will be just about half headed when the January frosts will ruin it. Cabbage when headed, resists the cold very well, but when half grown it is the most subject to be killed by the frost. The best quality of seed sown in September results in failure nine times out of ten. October-November sowings of Brunswick, Succession and Early Summer are almost sure to make splendid Spring Cabbage for shipping during April and May. On the Frenier Coast, where only Brunswick and Succession Cabbage is planted, they sow the seed between the 1st and 20th of October.

CABBAGE FLIES AND WORMS—An effective remedy against these pests is tobacco water. Boil stems to make a strong, dark brown extract, with which sprinkle your plants whenever the insects appear. Tobacco water is not injurious to the growth of Cabbage plants. Tobacco Dust and Slug Shot are splendid insect killers.

Sow in this month Pole Beans, Corn, Cauliflower, Cucumbers, Endive, Lettuce, Radish, Tomatoes, Turnips and Rutabaga.

Bush Beans may be planted about the end of this month. Corn can still be planted for roasting ears. Plant the Mexican June Corn.

Sow Tomatoes for a late crop. Sprout Lettuce seed before sowing. The Early Italian Cauliflower is the best adapted for this month.

TURNIPS—Be sure to make a sowing of White Dutch and Red Top.

Sow Balsams, Zinnias, Cockscombs for All Saints' Day blooming.

August.

Sow Beet, Bush Beans, Pole Beans, Cabbage, Carrots, Celery, Chervil, Cress, Cauliflower, Endive, Kale, Kohlrabi, Lettuce, Mustard, Parsley, Peas, Potatoes, Radish, Roquette, Shallots, Swiss Chard, Sorrel, all kinds of Turnips and Rutabaga.

CABBAGE—A sowing of Late Flat Dutch and Brunswick should be made in case the plants of the first sowing are destroyed by the weather. Use Tobacco Dust.

Put your vacant ground in Turnips, Beets and Rutabaga.

Sow Red and Yellow Radish and Early Peas. Use your Spray Pump on all crops against insects and fungous diseases.

Cow Peas can be plowed under to prepare land for Cabbage and Cauliflower.

CELERY—This is the best month for sowing Dwarf Celery for bleaching; be sure to try some New Giant Pascal and Golden Self-bleaching Celery.

Sow Early Italian, Algiers, Early Erfurt and Half Early Paris Cauliflower. Most planters prefer the Snowball as a sure header.

Plant Early Rose and Peerless Potatoes, using whole tubers kept from Spring.

CARROTS towards the end of the month. Mustard and Parsley. Set out Shallots and Creole Onion sets.

BUSH BEANS, especially Mohawk, Refugee and Yellow Six Weeks are planted, also Creaseback, Pole Beans. Some Wax Bush Beans may still be planted.

September.

Sow Beets, Bush Beans, Cauliflower, Carrots, Celery, Chervil, Cress, Corn Salad, Endive, Kale, Kohlrabi, Lettuce, Leek, Mustard, Onions, Onion Sets, Parsley, Parsnip, Peas, Radish, Roquette; Salsify, Shallots, Sorrel, Spinach, Swiss Chard, Turnips, and Rutabaga.

CABBAGE PLANTS should be set, out this month. Chances are against September sowings of Cabbage: only in case former sowings have been destroyed, another bed may be sown, but by all means followed by another sowing in October and November. See directions for July.

Set out Celery in ditches: Sow Spinach if the weather is cool.

Sow Passion and Trocadero Lettuce for shipping, and Royal Cabbage for house use and home market.

October.

Sow Beets, Cabbage, Cauliflower, Carrots, Chervil, Cress, Corn Salad, Endive, Kale, Kohlrabi, Lettuce, Leek, Mustard, Onions, Onion-Sets, Parsley, Parsnips, Peas, Radish, Roquette Salsify, Shallots, Sorrel, Spinach, Swiss Chard, Turnips and Rutabaga.

CABBAGE—Towards the 15th make a sowing of Brunswick, and follow with Succession and Early Summer. This is the time the planters of the Frenier Lake coast sow their Succession and German Brunswick Cabbage, of which I import large quantities for them.

ONIONS—Sow main crop of both Creole and Bermuda Onions.

STRAWBERRIES—Take up your plants, clean them from runners, and set out again. Of valuable varieties, the runners may be planted close together to form strong plants the following year.

PANSY, ASTER, PINKS and many other Flower Seeds should be sown this month.

See Flower Seeds. Plant bulbs for early bloom.

Sow Sweet Peas.

November.

Sow Beets, Cabbage, Carrots, Chervil, Cress, Corn Salad, Endive, Lettuce, Mustard, Parsley, Parsnip, Peas, Radish, Roquette, Spinach, Salsify, Shallots and Turnips.

Plant late Peas, especially Blackeyed Marrowfat, they stand frost and produce well if planted now.

Sow Spinach, red and black Spanish Radish, Brunswick and Early Summer Cabbage, in frames or a sheltered place where they can be protected against severe frost. These plants set out at end of January, make sure heads and in time for shipping.

December.

Sow Beets, Cabbage, Carrots, Cauliflower, Cucumbers, Endive, Lettuce, Mustard, Parsley, Parsnip, Peas, Potatoes, Radish, Roquette, Spinach, Egg-Plants and Peppers—these two in hot-beds. Write for Eichling's Catalogue and information on anything not contained in this book.

IMPORTANT.

There may be a few items not contained in this Catalogue on which you want information. We are always pleased to correspond with you. Our large connections in all parts of the world enable us to supply any article in our line you may want.

NEW!

NELSON'S BUDDING MACHINE for budding Pecan and other nut bearing trees. Easy to manipulate and a great success. You can bud your own Pecan trees with it and save money. Price \$4.00 each. Instructions with each machine.

IMPROVED COTTON SEED.

The South's great peculiar blessing is her Cotton, and this crop must remain her greatest Commercial Staple. Its production is the pursuit of the greater proportion of our rural population, and the margins of possible profit are as a rule so small that REDUCTION OF COST is the main consideration with the producer, and every means must be employed to this end.

There is no matter of more importance to the Cotton Planter than the character, variety and excellence of the Seed he plants. The first essential in the production of large crops upon small areas, the ONLY PRACTICAL method of production, is the BEST IMPROVED SEED. Such as give greatest increased yield, best quality and percentage of lint, selecting such as are best adapted to different sections and soils, thereby reducing to a great extent the cost of production.

We do not catalogue ALL that are advertised, but the best leading varieties, which are grown specially for our Seed purposes by most intelligent and Experienced Seed growers and planters.

Ozier—Russell, Big Boll, Prolific Long Staple. "The World Beater." This is of all known varieties of Long Staple Cotton the most profitable. Giving the heaviest crop to the acre and the finest quality of $1\frac{1}{4}$ inch staple. Once planted every other variety will be discarded. Pound 20 cents, half Bushel \$2.00, Bushel \$3.00, five Bushels \$10.00.

Herlong—A standard prolific variety, which has long maintained popular favor. Adapted to all sections, very prolific, symmetrical pyramid plant of distinct type, vigorous, grows off rapidly. Bolls large and compactly placed. Seed medium size, green and bronze color, yields 33 to 35 per cent. lint. Price per Bushel \$1.00.

Peterkin—Popular in all sections and fully merits its popularity, better adapted to thin lands than cluster varieties. Plant is a vigorous branching open grower. Bolls medium, seed very small, mostly black, yields 40 per cent. lint. Has given more general satisfaction perhaps than any one variety. More hardy and less liable to blight than cluster varieties, and withstands storms. Price per Bushel, \$1.00.

I. X. L. (Peerless)—One of the most productive varieties. Has long limbs with short joints, duplicate bolls at joints; very hardy; one of the earliest; planted in June will mature fully. Seed small and white or gray. Plant it once and you will continue to do so. Adapted to rich or thin lands. Price, per Bushel, \$1.00.

King's Improved—Extra early. Wonderfully prolific, long limbed, short jointed. Seed very small, light brown and gray color, lint 38 to 40 per cent. Has made 3 bales per acre in N. C. for Mr. King. Its great prolificacy and extra-earliness are its sufficient claims. Price, per Bushel, \$1.00.

Hawkins' Extra Prolific—Early, very prolific, Plant medium, two to four limbs near the ground, shorter limbs up, all well fruited, medium boll, small seed, gray or green color, lint about 35 per cent. Per Bushel, \$1.00.

Jones' Improved—Large stalk, limby and prolific, large bolls, which cluster closely on limbs and main stalk—easily and rapidly gathered. Seed large gray. Very favorably reported by Georgia Experiment station. Price, per Bushel, \$1.00.

Russel's Big Boll Prolific—The latest, and one of the best claimants of public favor. A type of striking peculiarities. Has wonderful vigor, hardiness and vitality, remaining green and growing through all vicissitudes until stopped by frost. Does not languish and rust like the less vigorous kinds. Stalk of beautiful pyramid form with numerous long limbs at bottom, shortening toward top and thickly set with very large 5 lock bolls, that are really tempting to the most indolent Cotton picker. Its tough foliage remains green—does not crumble and trash the lint, which keeps clean and bright. Grows and fruits throughout the season, opening gradually, thus affording better average grade of lint of good length and body. Its luxurious upright growth, offers great advantage in picking, and a large return of organic matter to the land when turned under with proper implements. It stands first in point of yield at the Experiment stations. Seed green and bronze color. Price, per Bushel, \$1.00.

OZIER-STERNS LONG STAPLE PROLIFIC COTTON.

No cotton will mature earlier than this; therefore it's more prolific than any other long staple cotton. Stays well in the hulls. Length of staple from $1\frac{1}{2}$ to $1\frac{3}{4}$ inches. Sold this season from 14 to 16 cents per pound, difference owing to grade—sold in Vicksburg for \$5.00 per bale more than for which any other long staple sold this season in Memphis. The value of this cotton this year over the short staple has averaged about 6 cents per pound, or \$30 per bale—a very handsome profit. Price, per Bushel, \$1.50. Three Bushel bag \$4.00.
